INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR § 1.97(c)

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

As a means of complying with the duty of disclosure set forth in 37 CFR § 1.53 and in keeping with the guidelines of 37 CFR 1.98, Applicants hereby submit information thought to be relevant to the examination of the above-identified application. Also submitted herewith is a completed form PTO-1449.

This information was cited in a European Search Report dated September 1, 2005, and it is hereby certified that this disclosure is being made within three months of that date.

Applicants, through their undersigned attorney, hereby certify that, unless submitted herewith, no English language translation is presently available to those individuals identified in 37 CFR § 1.56(c) for any non-English language references(s) cited.

Japanese Patent Application Publication No. 07-007635, Takeshima Masahiro, relates to a feedback control for black extension correction so that a video may be viewed without black paint-out by optimum black extension correction quality corresponding to a video state in a television receiver.

Japanese Patent Application Publication No. 11-069260, Ito Hiroyuki, relates to a television receiver by which reproduction with optimum contrast and black level is attained by automatically changing the degree of a black level extension by a black level extension circuit. The circuit is simple, based on a few components and configures based on the mean luminance level of an image.

Japanese Patent Application Publication No. 2000-244769, Nakai Kazumasa, relates to a video image with automatic contrast correction that increases a black detection level when a mean amplitude level of an input video signal is at or over a prescribed level so as to increase a black level part

to be expanded thereby emphasizing the black level.

Respectfully submitted,
